Map Making

Create a map of your favorite outdoor space (such as your back yard or a nature preserve) below. Be sure to include significant landmarks like fences, trees and gardens as well as smaller objects like bird feeders or rocks. Drawing a legend will help others identify the objects. If you have a compass at home, try orienting your drawing so the image of the compass matches north.

Once you're done with your map, hide something small but easily identifiable like a bright colored toy. Mark the location of the item on your map and see if someone else can find it! For an extra challenge, make it a competition and try timing each other.
